

INTEROFFICE CORRESPONDENCE

DATE: October 4, 1994
TO: T. R. De Mass, Decontamination and Decommissioning, Bldg. 080, X8760
FROM: G. D. Guinn, Decontamination and Decommissioning, Bldg. 080
SUBJECT: COMPLIANCE ASSESSMENT - GDG-001-94
DOE Order: 4700.1
Action: None Required

As part of assuming my position in the Decontamination and Decommissioning (D&D) group, an environmental compliance assessment should be completed to document the current status of the D&D projects. This will be completed over the next month on the following funded areas:

Pilot Project #2	Security Incinerator
Pilot Project #4	Tanks 177 and 178
Pilot Project #5	Building 889 (Removal)
Pilot Project #6	Building 777, Rooms 415 and 416
Pilot Project #7	Building 779, Rooms 152 and 154
Building 707	Module D and E (Demonstration Project)
Building 886	Complex Removal

This will be completed to determine compliance status, identify further required characterization, raise environmental concerns, and drive corrective action plans that will bring any non-compliance into compliance, if found. This will also facilitate my increase in knowledge in these projects, Rocky Flats operations, and D&D practices.

If there are any additional areas you would like me to review or any specific prioritization you would like me to utilize, please contact me.
